

Uadvantage *2.0*

Reimagined. Redesigned.
Reengineered to meet
the needs of your company.

Uadvantage is here to help you organize, execute, and control your paper volume - and now we've made it even better.

We have created a more powerful, flexible print sourcing and procurement solution. Read on to learn about Uadvantage new features.

Here's what's new in **Uadvantage 2.0**

More Efficient Management.

Manage projects and give milestone dates that can easily be communicated to all team members to keep projects on budget and on schedule.

Customizable, but still a Utility.

Individual users can customize their "home" screen to display the information they want. For other "system" changes, Client Administrators have flexibility, control, and speed at their fingertips.

Deeper Project Overview.

Increased number of fields on projects and the ability to view those fields as defined by the user will enhance the information that can be quickly accessed.

Printer-suggested Cost Savings Available.

Let the printing experts suggest cost savings with ideas your clients might not know about, saving them money.

High Resolution Files, Higher Quality.

Attach files up to 5GB in size for high resolution images, complex jobs, and complex shipping addresses.

Multiple Award Functionality.

Reduce cycle time and production time, getting the printed products to market faster and cheaper.

Multiple Line Items Now Available.

Choose the most economical options by component and by vendor, which allows you to produce your products on the most efficient equipment available.

UAdvantage Lite, for the Simple Jobs.

Allow users to complete the basics of an order and send it to appropriate team members for estimating and production, eliminating duplicate efforts.

Manage Events and Projects Even Better.

More detailed fields will allow better management of complex campaigns.

Speed Up Your Order Process.

Repeat orders can be ordered quickly, reducing time to market and administration time.

Direct (and Directed) Buy Functionality.

Clients can choose which method they prefer by cost center, departments, projects, or brands, allowing you to maintain compliance and fiscal responsibility.

Change Project Roles, Even After Someone's Assigned to a Project.

Users can have different roles on different projects which will enable them to be involved as little or as much as they are required for that project. Save time and have more efficient communications.

Customizable Workflow View.

Users can adjust their workflow to see the items they need to see - without being distracted by what they don't.

Simpler Messaging.

Allows client to communicate with other team members from a variety of electronic systems. There's no need to be logged in to reply, which means you can communicate without hovering around a computer 24/7.

Customized Names and Order Components.

Clients can name Specification Forms and order components to match the same terminology their company uses, which greatly reduces confusion.

Better Graphics, Better Communication.

Allows users that are not familiar with printing to be able to identify types of folds and products by viewing enhanced graphics.

More Quote Quantities.

Five quantities can be quoted simultaneously, allowing more options to meet budget concerns and marketing needs.

Multiple Quotes Available.

Let your clients run "what if" scenarios, reducing time by helping them compare their options.

Fast Paper Order Change Process.

Quickly use an alternative paper without the hassle.

Email Clients After Each Status Change.

Keep everyone up to date with all aspects of the job. These settings can be customized by users, so they choose how often and when they get status updates.

Identify Reasons for Selecting Suppliers.

Brings accountability to buyers, allowing them to identify reasons vendors were or were not awarded a given project.

Select New Destinations in Shipping, Within the Order.

Offers flexibility in shipping to drop ship where needed reducing freight and distribution cost by shipping directly where needed versus to a central location.

Single Printer Sign-on.

Printers can manage multiple accounts easily, saving time and increasing efficiency.
